8th April 2025

Dear Ms Parr,

**RE: PPC Permit MP3036SS, Variation LP3630MR – Whitehall Landfill
Quarterly Review Report – condition 4.2.2**

As required by the condition 4.2.2, this review of monitoring data covers the quarter commencing 17th December 2024.

Results of the monitoring conducted in this quarter are presented in the attached spreadsheet.

There was one breach of the ammoniacal nitrogen limit at BH1, and naphthalene breaches at BH1 and BH12. A schedule 6 report was sent on 24th March 2025 for these breaches. Repair works to BH3 are due to be completed shortly which should allow for a groundwater sample to be taken at the next monitoring round as required.

Graphs of carbon dioxide have been made available for the perimeter gas wells.

No significant amounts of methane were detected in the perimeter gas monitoring.

Gas data has also been provided for the in waste gas locations (GF01 to GF11).

Should you have any further questions regarding this matter, please do not hesitate to contact me.

Yours sincerely,

CEMEX UK Operations Ltd
