**Attn: Luke Burton**

Dear Luke,

**Re: DP3733BK – Docksway Disposal Site. Latest Area 2 Gas Monitoring Report, Round 244, June/July 2024.**

We write to provide the latest gas monitoring report for Area 2 of Docksway Disposal Site. Gas monitoring is required on a quarterly basis at Area 2 of Docksway Disposal Site, in accordance with the Environmental Permit EPR/DP3733BK.

We enclose with this report a data sheet showing the results collected in July 2024 (Round 244).

Gas monitoring wells are installed at approximately 100m intervals around the Area 2 landfill perimeter and there are currently thirteen available monitoring wells, as GP18\_18C has been destroyed and GP18\_18B has been incorporated into the gas collection system. Only eleven of the remaining wells were monitored during Round 244 as GP12\_23 was flooded and GP06\_25 was not accessible.

#### Trigger Levels

Trigger Levels for all the Area 2 wells are shown on the attached data table.

#### Results Summary

The methane and carbon dioxide concentrations recorded at each of the gas monitoring wells in July 2024 are summarised on the attached data sheet.

The concentrations of methane and carbon dioxide did not exceed the well specific trigger levels at the Area 2 wells monitored during Round 244.

Concluding Remarks

It is considered that the results obtained from this round of gas monitoring are within the range of results obtained since commencement of monitoring.

NCC will continue to undertake Area 2 perimeter gas monitoring on a quarterly basis and Stantec will continue to provide factual reports to NRW on a quarterly basis.

Yours sincerely,

**Technical Director – Geoenvironmental Services**  
on behalf of Stantec UK Ltd
