(1) The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, expressed in the same terms as the emission limit value. Where the emission limit value is expressed as a range, the result is given as the minimum - maximum measured values.

(2) Where an internationally recognised standard test method is used the reference number is given. Where another method that has been formally agreed with the Agency is used, then the appropriate identifier is given. In other cases the principal technique is stated, e.g. colorimetry.

(3) For non-continuous measurements the date and time of the sample that produced the result is given. For continuous measurements, or flow/time proportional samples, the percentage of the process operating time covered by the monitoring is given.

(4) The accreditation status of the equipment and/or the monitoring organisation, as appropriate, for the methods used for both sampling and analysis.

(5) The uncertainty associated with the quoted result at the 95% confidence interval, unless otherwise stated.

(6) The emission limit values for all substances is expressed as a maximum individual value

(7) W2 Flow not recorded as station power failure made DCS unavailable

Monthly Reporting – PPC Authorisation N° EPR/LP3131SW

Dear Mr. Baskerville

Please find the attached monthly environmental report for the period 01/08/2025 to 31/08/2025.

To include:

No Discharge to W1a & W1b – insufficient flow for analysis.

No discharge to W2 – Valve closed as precaution due to construction.

Should you require any further information, please do not hesitate to contact me.

Yours sincerely
