	Mercury and its compounds as Hg	0.01795 µg/l		N/A			
	Cadmium and its compounds as Cd	0.00513 mg/l		N/A			
	Mercury and its compounds as Hg	7.86 g/year		N/A			
	Cadmium and its compounds as Cd	2.25 g/year		N/A			

[1] The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, expressed in the same terms as the emission limit value. Where the emission limit value is expressed as a range, the result is given as the 'minimum – maximum' measured values.

- [2] Where an internationally recognised standard test method is used the reference number is given. Where another method that has been formally agreed with Natural Resources Wales is used, then the appropriate identifier is given. In other cases the principal technique is stated, for example gas chromatography.
- [3] For non-continuous measurements the date and time of the sample that produced the result is given. For continuous measurements the percentage of the process operating time covered by the result is given.
- [4] The uncertainty associated with the quoted result at the 95% confidence interval, unless otherwise stated.

NOTE: Unfortunately, there are no figures available from Dwr Cymru for July as they informed me today that they didn't take a sample, although I have put our figure in for effluent.
