### Introductory note

**This introductory note does not form a part of the notice.**

The following notice gives notice of the variation and consolidation of an environmental permit.

This NRW led variation incorporates several correction and changes to the current permit. It corrects errors in the current permit including minor formatting and wording errors and replaces an incorrect site plan. It also incorporates an extension of two deadlines for improvement conditions, IC12 and IC13. In addition, the current permit specified Biological Oxygen Demand effluent monitoring, the operator agreed with the regulator to use a surrogate Chemical Oxygen Demand. This has been carried out for over ten years, the permit is updated to reflect this.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
