Proposal summary

Please provide an outline of your proposal, including any sketches. As a guide, you should include: a description of the activities which (will) take place at your site, the means of abstraction/impoundment proposed, if the proposal is related to another licence or permit (i.e. an Environmental Permit to Discharge Water) and details of any survey work undertaken. For changes to existing licences, summarise the changes proposed. Sketches or photographs that will aid our understanding of your proposal can be uploaded below.

This application is for a technical variation to an existing abstraction licence and an existing impoundment licence. It addresses two issues:

1. The intake structure was built as a mirror image of the drawings appended to the existing licences. This was noted by NRW in their compliance reports CAR_NRW0042747 and CAR_NRW0042749. This variation application contains drawings which match the 'as-built' structure.
2. The compliance reports also noted that the 'Hands off Flow' notch's dimensions, and those of the coanda screen's notch, did not match those in the drawings appended to the licences. We have decided to modify both notches so that their dimensions match those in the original drawings. In this way we will not have to submit new hydraulic calculations. Instead, the hydraulic calculations approved by NRW during the original licence application in 2015 will still apply. The method we will use to modify the notches is noted on new drawings uploaded with this application.
