Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

**At this time, we do not intend to take any further action.**

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

## 4. Details of our assessment

### PERMIT INSPECTION

On Tuesday 16<sup>th</sup> December 2025 NRW Officers Cerys PHILLIPS, Nicola ROSSITER, Carla CURTIS, and Leah GOLDING attended the facility at 14:34 pm for an unannounced routine inspection of permit number DB3097HH. The weather was dry and cloudy at the time of inspection.

Upon arrival at the site, NRW officers met with General Manager Sean GOLDSWORTHY who gave a brief introduction regarding the site processes. He also showed documentation including environmental policies, FPMP and permits which are all easily accessible to staff should they wish to read them.

*Photo 1 - FPMP/FEEP easily accessible for staff to read*

Photo 2 - Environmental policy easily accessible for staff to read

Officers were then escorted through the building for an overview of operations, towards the permitted area. The current shelter has been damaged in recent storms, but a new cover had already been delivered and was awaiting fitting. However, this will only be temporary as a new larger, permanent structure will be built to cover the waste bins, along with other stored items.

*Photo 3 - Waste bins locked and in good condition*

The bin area was clean and tidy, with no waste on the floor. The bins were in good condition with none overflowing.

*Photo 4 - High curb bund which surrounds the site in good condition*

*Photo 5 - Sealable drain*

The permitted boundary was bunded with sealable drainage as shown in photos 4 and 5 and checked regularly as part of internal auditing procedures.

Photo 6 - Sign on front gates with emergency contact details

The site has good security, with an intercom on gates and an emergency contact with permit number on gate for public use shown in photo 6.

No offensive noises or odours were witnessed by any officer while on site.

### **WAMITAB**

## Important information

### Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm of the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

### Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action required for the permit condition assessed to avoid non-compliance. No non-compliance scored at this time
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description	Score
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property	60
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property	31
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property	4
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property	0.1

**How we use assessment scores**

The number and severity of non-compliances recorded in a year will affect your annual subsistence fee the following year. A non-compliance factor is added to your site's Operator Performance Risk Appraisal (OPRA) score when we calculate your fee to reflect the additional resource we use to assess permit compliance.

**If your assessment result in Section 1 is suspended, what does this mean?**

In line with our guidance, we may suspend scores for up to six months to allow time for remedial action to be taken. Suspended scores will be re-instated if the action is not completed.
