3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

On the 3rd February 2026 Environment Officers Harry Warburton, Leon Handley and Karen

Bowen undertook a compliance inspection of permit AF4027601 for Aberthaw East STW. Accompanied by DCWW pollution technician, catchment manager and performance manager. Weather at the time was light rain with heavy rain preceding.

This site has an unscreened inlet to a primary settlement septic tank, this gets desludged every 2 weeks by tanker. There were new sealed covers over the inlet to address the odour issues with this site. There is also Nutriox dosing at the primary tank to aid in addressing the odour. Following the primary tank is a copa sac, which is inspected weekly and changed when necessary.

The effluent is then distributed to a percolating filter bed, this was providing an even distribution over the media and had minor vegetation growth.

Following the filter bed is a final humus tank, this has covers over to address the odour issues. The log book was inspected and nothing of concern mentioned.

No actions.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm to the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action required for the permit condition assessed to avoid non-compliance. No non-compliance scored at this time
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property
