Recent significant damage has been sustained to the lower concrete apron below the Sea Defence Wall at Llanfairfechan. Resulting in exposed voiding with the outer sea defence alignment. Timely remedial measures have been requested by Network Rail asset teams. MGroup have been commissioned to undertake the repairs at the earliest opportunity.

The failure currently affects roughly a 30m of the sea defence, but the working area may extend up to 40m to ensure a secure repair.

The proposed works are planned to fill the void space with pumped concrete to reinstated the defence. A small excavator will be lifted from the rail, into position below the void on or close to beach level, in order to removed broken away material.

Envisaged sequence of works is as follows:

- ◆ Removal of failed material,
- ◆ Infilling and placement of clean stone material which has been scoured from the void,
- ◆ Concrete backfill and cap of the void (similar to previous designs implemented on this defence alignment),

Full details of the proposed repairs are detailed on drawings:
