Dear Renewable Energy Developments (Wales) Ltd,

RE: Abstraction licence WA/067/0002/004 and impoundment licence WA/067/0002/012

Thank you for confirming via email that the proposed hydroscheme at Arenig Fach, Bala, Gwynedd (SH 82791 42134) has never been built.

Your abstraction licence contains the following condition (condition number 9.11):

9.11 This licence shall cease to be of any effect if the abstraction it authorises has not commenced within 3 years of the licence issue date.

Your impoundment licence contains the following condition (condition number 4.6):

4.6 This licence shall cease to be of any effect if the intake works authorised by it have not commenced within 3 years of the licence issue date.

These are known as self-destruct conditions and are applied to *abstraction and impoundment licences* to help us secure the proper use of water resources and to prevent unused water being tied up in the event that proposals are unable to go ahead.

Self-destruct conditions include the date (the 'self-destruct date') by which *abstraction and intake work construction* must have commenced for the licence(s) to not expire and remain active.

Your email confirmed that the authorised abstraction and impounding work construction has not commenced by the self-destruct condition date. Your abstraction and impoundment licences have therefore expired in accordance with the self-destruct conditions and an applications for a new licences will need to be submitted if you still wish to progress with your previously licensed proposal.

Applications will be assessed on a case-by-case basis and will be subject to our normal determination processes, timescales and the appropriate fee.

Further information on how to apply can be found on our website where you can also submit your application(s):

Applying for a new abstraction and impoundment licence:

<https://naturalresources.wales/permits-and-permissions/water-abstraction-and-impoundment/apply-for-a-water-abstraction-or-impoundment-licence>

Information on our fees and charges is available on our website:

<https://naturalresources.wales/about-us/what-we-do/how-we-regulate/our-charges>

Applications must be supported by evidence to demonstrate that any issues which have delayed progression of the proposal by the previously applied self-destruct date have been resolved and that there is a continued justification of need for the water.

Please note: You must not undertake any abstraction and intake works until any new abstraction and impoundment licences have been issued for the proposal, including any licence required for the removal of an existing (part of fully built) structure.

Any abstraction and intake works construction/removal undertaken after the self-destruct date has passed and before any new licence is granted are illegal and subject to enforcement action, which could include prosecution.

Please ignore any further correspondence requesting the submission of returns (volume abstracted) data after the 23rd September 2017 (the self-destruct date applied to your licence).

Yours sincerely

Rhian Thomas

Environment Officer
