Glan Hirnant
Rhos-y-Gwaliau
Bala
Gwynedd
LL23 7EU

27/03/2026

Dear Edward Jones

Inspection of abstraction licence WA/067/0003/008 and impoundment licence WA/067/0003/028

During a site visit on 04/03/2026, confirmation that the proposed hydroscheme on Glan Hirnant at Rhos-y-Gwaliau, Bala (SH 94588 34354) has never built.

The purpose of the visit was to check compliance with the conditions of your licence(s).

Your abstraction licence contains the following condition (condition number 9.10):

9.10 This licence shall cease to be of any effect if the abstraction it authorises has not commenced within 3 years of the licence issue date.

Your impoundment licence contains the following condition (condition number 4.6):

4.6 This licence shall cease to be of any effect if the intake works authorised by it have not commenced within 3 years of the licence issue date.

These are known as self-destruct conditions and are applied to *abstraction and impoundment licences* to help us secure the proper use of water resources and to prevent unused water being tied up in the event that proposals are unable to go ahead.

Self-destruct conditions include the date (the 'self-destruct date') by which *abstraction and intake work construction* must have commenced for the licence(s) to not expire and remain active.

The visit confirmed that the authorised *abstraction and impounding work construction* has not commenced by the self-destruct condition date. Your *abstraction and impoundment licences* have therefore expired in accordance with the self-destruct conditions and *applications for a new licences* will need to be submitted if you still wish to progress with your previously licensed proposal.

Applications will be assessed on a case-by-case basis and will be subject to our normal determination processes, timescales and the appropriate fee.

Further information on how to apply can be found on our website where you can also submit your application(s):

Applying for a new abstraction and impoundment licence:

<https://naturalresources.wales/permits-and-permissions/water-abstraction-and-impoundment/apply-for-a-water-abstraction-or-impoundment-licence>

Information on our fees and charges is available on our website:

<https://naturalresources.wales/about-us/what-we-do/how-we-regulate/our-charges>

Applications must be supported by evidence to demonstrate that any issues which have delayed progression of the proposal by the previously applied self-destruct date have been resolved and that there is a continued justification of need for the water.

Please note: You must not undertake any abstraction and intake works until any new abstraction and impoundment licences have been issued for the proposal, including any licence required for the removal of an existing (part of fully built) structure.

Any abstraction and intake works construction/removal undertaken after the self-destruct date has passed and before any new licence is granted are illegal and subject to enforcement action, which could include prosecution.

Please ignore any further correspondence requesting the submission of returns (volume abstracted) data after the 3 August 2018 (the self-destruct date applied to your licence).

Yours sincerely

Environment Officer Dwyfor & Meirionnydd Team
