Same terms renewal

Are you applying for a same terms renewal?

Yes

Use this section to show us how you have calculated the amount of water you require. This should include details of your operational regime (for example, number of hours and days you intend to abstract, number of units produced or area to be irrigated). We use this information to determine if the volumes you propose to abstract are appropriate for the purpose. Depending which industry you are in, you may need to provide additional information below.

If your water usage has been lower than your licensed volumes, you will need to provide additional information to demonstrate your continued need for the water, for example, additional justification or a Business Case.

System has not been modified since initial commission in 2013 (licence granted 20.12.2011) - Authorisation was then granted to use no greater than 62 l/s, 5,356.8 m³ per 24 consecutive hours and 1,178,496m³ annually; these quantities have not been exceeded. This hydro-electric scheme is rainfall dependent and therefore seasonal. It is self regulating via a water pressure device which ensures Q95 and HoF are satisfied, reducing, monitoring and eventually shutting down extraction based on insufficient water replenishment.
