4. Details of our assessment

The site is permitted (CG0406201) to discharge to off-site to the Afon Ffraw when the flow exceeds 12.8 litres per second. This assessment covers a full year of data (04/02/2025 – 03/02/2026).

2.3.3 For the discharge(s) specified in table S3.3: (a) The discharge shall only occur when and only for as long as either: (i) the flow passed forward is equal to or greater than the overflow setting indicated due to rainfall and/or snow melt

For the period 04/02/2025 – 03/02/2026, the asset only spilled for 15 minutes, and that was following a period of heavy rainfall. The dataset provided was made up of 34984 "blocks" of 15 minute data. **This means the site did not spill for 99.997% of the time inspected** $((1/34984)*100 = 0.003)$ and is deemed compliant.
