Dear Sir/Madam

Subject: Marine Licence Application for Fishguard Replacement Linkspan

I am writing in response to your email dated 1st May.

I can confirm that Appendix 17.C sampling plan results submitted within the Marine Licence and accompanying Environmental Impact Assessment are the same as submitted previously under application CML2533 which encompassed a larger licensable area and therefore sampled area.

The areas within the sampling area that are no longer of relevance to application CML2612 are:-

- Area A (Basin) samples ID VC-006 at depths 1.9-2m and below.
- Area B&C (approach) samples ID VC-008 and GS-008 at all depth
- Area E (channel) samples ID VC-010 and GS-010 at all depth
- Area H (outer basin to north) samples ID VC-009 and GS-009 at all depth
- Reclamation Area samples ID VC-003 at all depth

To clarify the only sample of relevance is within Area A (Basin) samples ID VC-006 at depth 0.9m – 1.0m and GS-006

Should you require anything further, please do not hesitate to contact me.

Yours sincerely

Michelle Price
