3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

On 14 April myself and Kirsty Allwood attended site on a pre-arranged meeting with the permit holder Mr Bridgeman and site maintenance contractor. Thank you for your time during the visit.

On arrival we discussed the requirements in the permit (condition 4) for a suitable sample point, and I advised at the time that the current setup did not conform to the industry standard and has the potential to compromise any sample taken. There are multiple options available but it was discussed on site that your current preferred option is to maintain the system 'as-is' and assess whether the risk is sufficient or too high. The sample taken at your request has since been analysed and the results are as follows:

		Limit
Ammoniacal Nitrogen	<0.5 mg/l	N/A
Biochemical Oxygen Demand	5.84 mg/l	40 mg/l
Orthophosphate	4.6 mg/l	N/A
Suspended Solids	12 mg/l	60 mg/l

There is potential that this discharge may be called in for review and a Phosphate limit imposed - in line with current NRW policy this is happening across multiple permits discharging >20m³/day. I cannot say if or when this may happen but this sample would be within the potential 5 mg/l backstop limit.

ACTION: If you are satisfied with the current setup as providing a representative sample, as suggested by the results above, please confirm in writing/by email and we will continue with the existing location as the registered consent point.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.
