Result types are explained in more detail in the 'Important Information' section below.

Total non-compliances recorded	Total non-compliance score
2	0.2

How we use the non-compliance score to calculate your annual fee is explained in the 'Important Information' section below.

2. What action is required?

Criteria	Action needed	Complete by
IR1A	The environment policy needs a review date added (at least every 4 years)	11/06/2026
IR1A	Site incident response plan needs updating with current names/information	11/06/2026

Compliance criteria codes are listed in the 'Important information' section below.

3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

Gwynt y Mor poultry unit was visited on 27th April 2026.

Condition 1.1 - General Management

1.1.1 (a) - the incident response plan is outdated, for example, section 15 has the previous managing director listed as the contact in an emergency

1.1.1 (a) - the environment policy is missing a review date

Action: Update the incident response plan with current information, and update the environment policy to include a review date (should be reviewed no less than every 4 years) by **June 11th 2026**

Recommendations:

These comments are not part of the permit requirements but were noticed during the inspection:

1) Farm Checklist Audit Report was present and signed off, but missing some confirmations from the washing team and spreading contractor

- It is recommended you prompt the third parties involved in the site turnaround to complete the paperwork as required to demonstrate complete biosecurity control
- 2) Fallen stock collection paperwork is a mix of Cat 1 and Cat 2 categorisation
- It is recommended you look into the reason for this. If the waste produced is always the same, perhaps the tickets should reflect this
- 3) The weekly generator checklist was missing a few weeks of checks
- It is recommended these checks are done every week to identify potential maintenance or pollution issues

Summary

Overall the site was well maintained, with improvements made to the maintenance and health & safety records kept since the last visit. The site continues to perform well during the inspections with good control over the paperwork and site infrastructure.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm of the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action required for the permit condition assessed to avoid non-compliance. No non-compliance scored at this time
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description	Score
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property	60
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property	31
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property	4
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property	0.1

How we use assessment scores

The number and severity of non-compliances recorded in a year will affect your annual subsistence fee the following year. A non-compliance factor is added to your site's Operator Performance Risk Appraisal (OPRA) score when we calculate your fee to reflect the additional resource we use to assess permit compliance.

If your assessment result in Section 1 is suspended, what does this mean?

In line with our guidance, we may suspend scores for up to six months to allow time for remedial action to be taken. Suspended scores will be re-instated if the action is not completed.
