On 26th February 2026, DCWW submitted Dry Weather Flow data for 2025, as required by

the permit.

More than 14 consecutive days of the 365 daily volume readings were not 'Good' readings. This is a breach of permit condition 3.3.7 (c) :

There shall be no more than 37 days and/or no more than 14 consecutive days with 'suspect' or 'missing' Total Daily Volumes in a calendar year, unless otherwise agreed in writing by the Natural Resources Wales.

A recent reply to the previous CARS detailed that mains power is needed to be installed to power the flow meter and a program plan is being compiled. There are no alternative flow readings for the site.

Actions :

1) Provide a program plan with timescales for the installation of an appropriate flow meter to enable DWF data to be submitted as required by the permit. The plan should be submitted by 15th June 2026 unless a different date is agreed with the local environment team.
