2. What action is required?

No action required.

3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

The site was visited during a period of dry weather.

The aim of the visit was to finalise a means for Natural Resources Wales (NRW) to be able to take a sample of the treated waste water safely, as part of our routine compliance monitoring programme.

Discussions had taken place between the company and NRW about the sampling point location. The taking of samples at height from the treatment tank was deemed inappropriate in terms of health and safety, and the focus had moved to the effluent chamber covered by a weldmesh grill.

After discussion, the company had developed a sampling collection tube that fitted between the weldmesh bars. It was demonstrated that effluent could be collected from the black effluent pipe using this tube, without contaminating the sample, and without having to cut the weldmesh to allow for a larger NRW sampling can.

There was no ongoing discharge of effluent at the time of the visit, but a release of effluent from the treatment process showed that it was of excellent quality.

It's understood that during dry weather its unlikely that there will be a discharge from the site as the water will be used as part of the production process.

Following the visit, it was agreed with the NRW monitoring team that the company's sampling tube would be a safe and appropriate means of sampling the effluent.

It would be appreciated if the sampling tube could be made available when NRW staff visit the site as part of the routine compliance monitoring programme.

Thank you for your kind co-operation in dealing with this matter and during the visit.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm to the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action required for the permit condition assessed to avoid non-compliance. No non-compliance scored at this time
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property
