### 1. Summary of our findings (full details in section 4)

| Part of permitted activity assessed (criteria)                        | Assessment result | Non-compliant permit condition |
|-----------------------------------------------------------------------|-------------------|--------------------------------|
| WQ-C1 - Water Quality - Emissions and monitoring - Emissions to water | Assessed (A)      |                                |

Result types are explained in more detail in the 'Important Information' section below.

### 2. What action is required?

No action required.

### 3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

**At this time, we do not intend to take any further action.**

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

### 4. Details of our assessment

Following reports of pollution in the area resulting in sickness, a visit was carried out to the discharge that takes place under permit ZP3328XU.

The permit stipulates that the discharge must be clear and have no adverse visible effect

on the receiving water, the bed of the watercourse or any plants or animals within the watercourse.

There was a very gentle flow going through the system at the time, with the discharge from this running clear.

The first tank was found to have a good amount of aeration taking place. The second tank had a crust of sludge on the surface, and the third tank had a good amount of sludge settled on the bottom.

Although the discharge is clear, it is advised that maintenance is carried out to desludge the system to ensure no sludge is carried through the discharge.

Please do not hesitate to contact me to discuss this further.

## Important information

### Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm to the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

### Assessment results and non-compliance categories (used in section 1):
