Glanyfferi (Ferryside) Floodwater Outlet Extension

Marine Licence number: CML2613

Introductory note

This introductory note does not form a part of the marine licence

The main features of the marine licence are as follows.

The works comprise excavation of a trench across Glanyfferi (Ferryside) Beach and installation of a buried outfall pipe extending the existing surface water discharge point further into the River Towy to reduce blockages caused by tidal debris. The pipe will be installed on a bedding layer, secured with precast concrete collars and protected by concrete mattress systems before the trench is backfilled and the beach profile reinstated.

A new outfall structure, including a vertical riser and diffuser head, will be constructed at the discharge point. Modifications will also be made to the existing outfall chamber to connect it to the new pipework.

The new culvert extension will be buried beneath the beach with only the connection and new outfall structure remaining visible.

Works will be undertaken at low tide using land-based construction plant, with excavated beach material reused where possible to reinstate the beach profile.

The status log of the marine licence sets out the marine licence history, including any subsequent marine licence variation(s)
