Inspection Report – Package Treatment Plant Serving Gwern Gof Isaf (Permit Ref: WQD009971)

On 7 July 2026, NRW Officer Nathan Owen carried out an inspection of the Package Treatment Plant serving Gwern Gof Isaf, operating under permit reference WQD009971.

Weather conditions on the day were warm with a light breeze. There had been no significant rainfall within the catchment area for a number of days prior to the inspection.

NRW officers were met on site by the operator, who provided an overview of the treatment process and the maintenance regime in place. The operator advised that the plant had been operating without grease cartridges due to a lack of availability from the supplier; however, replacement cartridges were expected to be installed by the end of the week.

The operator confirmed that the treatment plant is fitted with an alarm system to notify them of any operational issues. Inspection of the discharge outfall did not identify any concerns regarding the quality or condition of the discharge. However, significant nettle growth was observed around the outfall. NRW requested that the vegetation be strimmed back to maintain access, protect the integrity of the outfall, and ensure continued visibility for inspections.

During the visit, discussions took place regarding whether the treatment plant formed part of NRW's regulatory monitoring programme. Subsequent internal enquiries confirmed that the site was not currently included within the programme. Following positive discussions with the operator, who expressed a willingness to facilitate regular monitoring activities, NRW has now registered the treatment plant for regulatory monitoring.

I can confirm to the operator that the treatment plant referenced above has been added to the NRW monitoring programme, and samples are scheduled to be collected during Quarter 3 (Q3) and Quarter 4 (Q4).

NRW would like to thank the operator for their time, cooperation, and assistance during the inspection.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm to the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action required for the permit condition assessed to avoid non-compliance. No non-compliance scored at this time
