1. Summary of our findings (full details in section 4)

Part of licenced activity assessed (criteria)	Assessment result	Non-compliant licence condition
WR-B1 - Water Abstraction - Abstraction measurement and records - Means of measurement	C3 Minor	7.1 (i)- Means of measurement of water abstracted: The Licence Holder shall use one meter for each separately identified purpose to measure quantities of water abstracted

Result types are explained in more detail in the 'Important Information' section below.

2. What action is required?

Criteria	Action needed	Complete by
WR-B1	Install meters for each separately identified purpose to measure quantities of water abstracted	30/11/2026

Action criteria codes are listed in the 'Important Information' section below.

3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution or civil sanctions being imposed depending on the circumstances of the offence.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

I (Environment Officer Gavin Dodd) arrived at Bryn Quarry, Caerphilly at 12:30 on 9th June 2026 to conduct an inspection regarding a licence to abstract water (licence ref WA/057/0022/0005). After a brief discussion at the site office with manager Jennifer Price, I was accompanied on site by Elinor Williams, AD Technician.

The site is authorised to abstract 217,065.5 cubic metres per year for the purpose of dewatering (from area 'A') and 7,290 cubic metres per year for the purpose of dust suppression (point B). The permit also allows the abstraction to be used for vehicle washing (Point B) and agriculture other than spray irrigation (Area 'C'). Flow readings from the metre were sent shortly after the visit and showed that the limits in the licence had not been exceeded and the instantaneous flow right was similarly within limits; there was an issue with the online returns portal preventing the returns being submitted digitally.

The source of supply is underground strata (within area 'A') with the means of abstraction being a submersible pump; this is the only point of abstraction being used currently. The pump was in operation during the inspection and appeared to be in good working order. However, while a metre was in place for the abstraction, there was no way to determine quantities of water which were being used for each identified purpose; under condition 7.1, a separate meter is required for each of these activities. No further issues were identified during the inspection.

Figure2: Meter for the abstraction on site

Breaches of permit condition

7.1 (i)- Means of measurement of water abstracted: The Licence Holder shall use one meter for each separately identified purpose to measure quantities of water abstracted

Justification: Only one meter is used on site currently for all separately identified purpose, it is not possible to determine the quantities of water which are being used for each purpose currently.

Action required by date specified:

Install meters for each separately identified purpose to measure quantities of water abstracted

The deadline for the above action is 30th November 2026

Important information

Legal status of this report

Your licence is issued to you under the Water Resources Act 1991 as amended by the Water Act 2003. You have a responsibility to comply with the conditions of your licence and prevent pollution/harm to the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action required for the licence condition assessed to avoid non-compliance. No non-compliance scored at this time
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property
