Dear Bob,

Many thanks for the report and updated WSI. No issues with those from our perspective, happy to sign-off on the updated WSI. Have these documents been submitted to NRW as part of the condition discharge, or have they come to me in the first instance? If so, then I'm more than happy for this email to be appended with any NRW submission to make it clear that things have been signed off.

I know that Mark is in the process of prepping the AEZ material for archiving with ourselves, so that is all in hand. In the meantime, would it be possible to receive a shapefile of the project AEZs please? This would just make it easier to review the info within the report against our existing dataset and add new data to site records within the National Monuments Record, where needed.

Julian

Dear Julian,

I attach the report on the archaeological analysis of the UXO survey data undertaken by MSDS. I also attach an update of the WSI (Rev04), which has been amended with the new AEZs and additional baseline information following the UXO surveys (Ive also updated the section numbers to make it easier to read).

Please don't hesitate to let me know if you have any questions at all, or if you'd like to discuss anything further.

Kind regards,

Bob

Hi Bob,

Thanks for the update, sounds very positive on the UXO surveys, looking forward to reading that in due course.

In terms of the data archive. Yes, what we were looking for was a geotif of the AEZs as the main thing.
