Registered Office	Bryn Pica Llwydcoed Aberdare CF44 OBX
Emergency Telephone No	01685 870 770

This notice will be maintained in good order throughout the operational life of the site.

3.2 Site Security

The purpose of security procedures is to prevent unauthorised tipping, entry and to safeguard Company property from thieves and vandals. This is achieved by:

- Preventing unauthorised access to the site.
- Making buildings secure.
- Immobilising plant out of working hours.
- Locking up property or otherwise making it secure.
- Alarms, lights or other means to discourage intruders.
- Prosecuting offenders whenever possible.

3.2.1 Security Provision and Maintenance

The existing site security fence will be maintained and improved where necessary to deter unauthorised access to the site. Adjacent to public areas this consists of a 1.8m high - chain link fence. Elsewhere the fence consists of timber posts and wire strand, in association with embankments and vegetation.

The Landfill Manager, or delegated representative, will inspect the perimeter fencing once a week. Perimeter barriers that are found to be in poor condition will be temporarily repaired as soon as possible then permanently repaired to BS 1722 within one month thereafter. All serious damage or breakage shall be reported to determine if further action is required. All inspections will be recorded in the Site Diary.

The site is provided with full time security outside of operational hours. The security personnel are responsible for keeping the gates locked to ensure that there is no unauthorised access to the landfill site. There is a direct telephone link for security use and members of staff are nominated key holders who will be contacted in cases of emergency. The key holders and emergency contact numbers are given in Appendix 5.

There is close circuit television located at the Site office building with monitor and recording facility within the weighbridge office. During daylight hours this is used to monitor the incoming loads, however, outside of operational hours it monitors the site compound gate and the approach to the weighbridge.

Site staff will be instructed that, in the event of finding evidence of unauthorised access and/or vandalism, that the matter must be reported to the Police. If the incident involves unauthorised tipping, the Environment Agency will also be informed as soon as reasonably practicable.

3.2.2 Visitors

Unauthorised persons are not allowed beyond the Site Offices and Weighbridge.

Visitors to the Site must call at the site office, identify themselves and state the nature of their business. Unless the caller is known, he/she will not be allowed to find their destination unaccompanied.

3.3 Security of Buildings and Property

3.3.1 Buildings

The following actions shall be undertaken to ensure the security of buildings and property:

- keys to Company property will only be kept by authorised persons;
- a key register shall be compiled and maintained;

3.3.2 Vehicles and Mobile Plant

All vehicles and mobile plant are locked when not in use.
