4. Details of our assessment

Compliance inspection of Millfield Drive SPS AJ0028001. Undertaken by Environment Officer Harry Warburton, accompanied by DCWW. Weather at the time was drought.

Millfield Drive SPS is a storm and emergency discharge pumping station with a permitted overflow setting of 6mg/l and storage capacity in the wet well of 11m³. A screen was visible at the outlet at the top of the wet well, this was clear of debris. The EDM monitor was at the top of the wet well, this appears to be of newer designs due to having the green/red light system for when not in spill and in spill.

The outfall to the River Thaw was partially visible, the location was in a residential garden and slightly overgrown. The watercourse had not signs of impact.
