Dear *Richard*

Total Waste Services Limited - Llandow

Yesterday a very serious incident occurred at Tythegston Landfill Site. A load of waste delivered by UK Waste originating from the above location was inspected by staff of the Environment Agency and found to contain clinical waste in the form of sharps. Incriminating material was removed from site by the Environment Agency inspectors and we anticipate that the Agency may take further action in due course.

The incident occurred in spite of earlier complaints from me and my staff to UK Waste, including two letters dated 26 April '96 and 2 May '96 and your assurances that breaches of the Duty of Care legislation, my company's waste management licence, and the disposal agreement between our two companies would not re-occur.

I trust you will understand that I have no choice but to prohibit, with immediate effect, any further deliveries of waste by your company originating at this source. I will not allow the standing of Davies Bros to be compromised by the activities of UK Waste or UK Waste's customers.

I look forward to hearing from you.

On the matter of disposal arrangements from November this year, I understand that Chris Cox has yet to receive a response to his proposal of 19 April 1996. I trust you will respond to Chris very shortly.

Yours sincerely

RP. Jeff Davies
Managing Director
