3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

On the 17th August 2026, NRW received a retrospective Self report from DCWW for Cefn Mawr Sewage Pumping Station (SPS).

A short discharge happened on the 15th Aug 2026. The spill occurred for just over an hour, between 18:00 - 19:06.

DCWW attended site on the 15th to rectify the issue with the pump, that caused the asset to spill and to collect a sample from the well.

A further update was provided by the pollution technician on the 19th August.

Both of the inlet pumps had failed and required resetting. Once they were reset and started to pump again, the well level was returned to normal and there have been no further issues. The outfall was inaccessible due to thick vegetation. The well sample was obtained on the 15th and was refrigerated and then was tested 2 days later, on the 17th at 11:29. The results were: Ammonia 7.62mg/L & Turbidity 83FTU.

Actions:
Confirm the alarms have been reviewed to give an early warning to the pumps tripping to prevent discharge occurring before the flow passed forward is equal to or greater than the overflow setting indicated due to rainfall and/or snow melt - **deadline 30th September 2026**.

Please ensure NRW are notified of future self reports as soon as reasonably practicable.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm to the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action required for the permit condition assessed to avoid non-compliance. No non-compliance scored at this time
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property
