### Section 1 – Compliance Assessment Summary

This is based on the requirements of the permit under the Environmental Permitting Regulations or the licence under the Water Resources Act 1991 as amended by the Water Act 2003. A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

Permit conditions and compliance summary	CCS Category	Condition(s) breached
A1 - Specified by permit	A	
B3 - Infrastructure - Site drainage engineering (clean and foul)	A	
B4 - Infrastructure - Containment of stored materials	A	
B5 - Infrastructure - Plant and equipment	A

### **Compliance Assessment Report – Valley Recycling Limited**

Officers Jonathan LEE and Geraint HARRIS in attendance of Berthgron Quarry Transfer Station, Nelson to complete a routine compliance inspection of the permit EPR/UP3695FZ held by Valley Recycling Limited. Weather was cool and dry at the time of the inspection. Officers met with site manager, Mr Lyn Bowen, who showed officers around the facility.

The visit consisted of an inspection of the permitted area and a discussion in the site office regarding duty of care paperwork and site management documents.

#### **Inspection**

The site was organised and appeared well managed at the time of the inspection. Incoming waste streams were clearly stored in individual bays or the appropriate skips after being sorted by plant machinery or by hand on site. It was noted that the site had been relatively quiet recently, with incoming skips typically processed very quickly.

No crushing equipment was active at the time of the inspection. However, Mr Bowen clearly explained the management of crushing activities when operational. The several stockpiles of inert wastes awaiting crushing/stockpiles of processed aggregates were clearly segregated and contained minimal contamination. Mr Bowen explained that processed aggregates were exported from site as product, as the site processes the waste in accordance with the WRAP Quality Protocol for production of aggregates from inert waste. A copy of the operator's quality management document for this process was available in the site office. Officer Lee reminded Mr Bowen of the need to retain copies of delivery documents for exported recycled aggregate, as required by the quality protocol.

No issues were apparent with site drainage or the engineered surfaces of the site.

Copies of all relevant duty of care waste transfer notes, site management documents and WAMITAB certificates were available for inspection by officers in the site office.

## **Compliance Breaches**

No permit breaches were identified during the inspection. Categories assessed have been marked as compliant accordingly.

## **Summary**

Thank you for taking the time to show officers around the site.

### Section 3 – Enforcement Response

You must take immediate action to rectify any non-compliance and prevent repetition. Non-compliance with your permit conditions constitutes an offence and can result in criminal prosecutions and/or suspension or revocation of a permit. Please read the detailed assessment in Section 2 and the steps you need to take in Section 4 below.

Other than the provision of advice and guidance, at present we do not intend to take further enforcement action in respect of the non-compliance identified above. This does not preclude us from taking enforcement action if further relevant information comes to light or advice isn't followed.

### Section 4 – Action(s)

This section summarises the actions identified during the assessment along with the timescales for when they will need to be completed.

Criteria Ref.	CCS Category	Action required/advised	Due Date
See Section 1 above			

## Section 5 – Compliance notes for the Operator

To ensure you correct actual or potential non-compliance we may

- Advise on corrective actions verbally or in writing
- Require you to take specific actions verbally or in writing
- Issue a notice
- Require you to review your procedures or management system
- Change some of the conditions of your permit
- Decide to undertake a full review of your permit

Any breach of a permit condition is an offence and we may take legal action against you

- We will normally provide advice and guidance to assist you to come back into compliance either after an offence is committed or where we consider that an offence is likely to be committed. This is without prejudice to any other enforcement response that we consider may be required.
- Enforcement action can include the issue of a formal caution, prosecution, the service of a notice and/or suspension or revocation of the permit.

**See our Enforcement and Civil Sanctions guidance for further information**

This report does not relieve the site operator of the responsibility to

- Ensure you comply with the conditions of the permit at all times and prevent pollution of the environment
- Ensure you comply with other legislative provisions which may apply

### Non-compliance scores and categories

CCS category	Description	Score
C1	A non-compliance that could have a major environmental effect	60
C2	A non-compliance which could have a significant environmental effect	31
C3	A non-compliance which could have a minor environmental effect	4
C4	A non-compliance which has no potential environmental effect	0.1

**Operational Risk Appraisal (Opra)** - Compliance assessment findings may affect your Opra score and/or your charges. This score influences the resource we use to assess permit compliance.
