3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

NRW understand that an infiltration investigation is due to start in April 2026. Please provide report to NRW when complete.
Infiltration is a known issue on the sewer network.
NRW understand that tankering is taking place at a certain point of the network sewer.

Please provide details of what the issue is and when it will be resolved.
NRW also understands that a scheme is to undertaken at the site which will incorporate a reed bed, due to be completed in 2027. Please provide scheme details and a completion date.
The site is currently FPF compliant for 4.2 l/ps.

Please provide the information requested by 31 May 2026.

Correspondence received from DCWW 7/10/2026

'The infiltration and inflow (I&I) investigations are now substantially complete. Areas of infiltration have been identified and a number of remedial works, including sewer lining, have already been completed. Some further investigation and remedial works remain ongoing. These works are expected to improve the issues identified in the area, and further monitoring will be undertaken during the winter months to assess their effectiveness. The investigation will therefore remain ongoing while this monitoring and any outstanding remedial works are completed.

Tankering was required as a temporary mitigation measure due to significant infiltration and water ingress identified within the sewer network. DCWW has since undertaken investigations and completed remedial works to reduce infiltration. The effectiveness of these works will be monitored over the winter period, when infiltration risk is typically greatest. The need for tankering will be reviewed based on this monitoring, and further investigation or remedial works will be undertaken if required.'

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm to the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action required for the permit condition assessed to avoid non-compliance. No non-compliance scored at this time
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property
