3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

You are non-compliant with your permit.

At this time, we are issuing you with a warning for the non-compliance recorded above. Warnings may influence future enforcement response for continued or further non-compliance.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

This Compliance Assessment Report is being produced following an inspection conducted by Luke Taylor (Senior Officer - Waste Regulation).

The weather at the time of the inspection was dry and bright, and the site was operational.

The officer was accompanied throughout by a member of staff.

The following non compliance were identified.

(W3B) Emissions of substances not controlled by emission limits - Permit Condition 3.1.3 - Category 3 Breach
You have been scored for the above breach as it was witnessed during the inspection that both an IBC containing waste oil and a cage containing waste paint tins, had not been provided with secondary containment.
Your permit states that all liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment.

To continue to store the wastes within these two containers, you must ensure that they are provided with adeqaute secondary containment. In the case of waste oil, the The Water Resources (control of Pollution) (Oil Storage) (Wales) Regulations 2016, which is directly applied legislation, states that the secondary containment must have a capacity not less than 110% of the container's storage capacity.
ACTION - Provide secondary containment where required. Deadline 31/10/2026

W1A General Management - Permit Condition 1.1.1 - Action Only
W3G Fire - Permit Condition 3.5.1 - Action Only
The site Environment Management System and Fire Prevention and Mitigation Plan (FPMP) have been updated since the previous inspection, in the case of the FPMP, to comply with the latest guidance issued by NRW.

When reviewed on site, there were some out of date document references refering to superceeded annexes and plans. These both need to be checked to ensure that the correct and updated document references are present. Once the revisions have been made, submit copies to NRW for a full review.

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm of the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action required for the permit condition assessed to avoid non-compliance. No non-compliance scored at this time
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description	Score
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property	60
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property	31
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property	4
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property	0.1

How we use assessment scores
The number and severity of non-compliances recorded in a year will affect your annual subsistence fee the following year. A non-compliance factor is added to your site's Operator Performance Risk Appraisal (OPRA) score when we calculate your fee to reflect the additional resource we use to assess permit compliance.

If your assessment result in Section 1 is suspended, what does this mean?
In line with our guidance, we may suspend scores for up to six months to allow time for remedial action to be taken. Suspended scores will be re-instated if the action is not completed.
