|---|---|
| 0 | 0 |

How we use the non-compliance score to calculate your annual fee is explained in the 'Important Information' section below.

## 2. What action is required?

No action required.

## 3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

**At this time, we do not intend to take any further action.**

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

## 4. Details of our assessment

**W1A & W2A – General Management and Permitted Activities**

A routine site inspection was undertaken on **9 October 2026**.

Permitted activities were assessed during the inspection and were found to be compliant. No non-compliances with permit conditions were identified.

Site operations were contained within the permitted boundary and were not considered to be having a detrimental impact on the surrounding area.

The site was observed to be well managed, with different waste streams and aggregate grades clearly segregated and appropriately stored.

During the inspection, a discussion was held regarding the requirements of the WRAP Quality Protocol and the standards that must be met for recycled aggregates to achieve end-of-waste status. Natural Resources Wales is likely to focus on this area during future inspections.

Guidance on end-of-waste criteria for the production of aggregates from inert waste can be found in: https://assets.publishing.service.gov.uk/media/5a7c38bce5274a1f5cc769c8/LIT_8709_c60600.pdf **– End of Waste Criteria for the Production of Aggregates from Inert Waste**.

**W2D – The Site**

The site was secure at the time of the inspection and benefits from additional security measures located at the entrance to the industrial estate.

**W2E – Waste Acceptance**

All waste observed on site was consistent with the list of wastes authorised for acceptance under the permit.

**Matters for Discussion at the Next Inspection**

Natural Resources Wales is likely to focus on the following areas during the next inspection:

- Compliance with the relevant Quality Protocols for the production of recycled aggregates.
- The management and end destination of soils and fines generated during

processing activities.

# Important information

### Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm of the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

**Assessment results and non-compliance categories (used in section 1):**

| Assessment result | Description |
|---|---|
| Assessed (A) | Assessed or assessed in part, no evidence of non-compliance found |
| Action only (X) | Action required for the permit condition assessed to avoid non-compliance. No non-compliance scored at this time |
| Ongoing (O) | Ongoing non-compliance, not scored |

| Non-compliance category | Description | Score |
|---|---|---|
| C1 Major | Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property | 60 |
| C2 Significant | Potential to have a significant impact or effect on the environment, people and/or property | 31 |
| C3 Minor | Potential to have a minor or minimal impact or effect on the environment, people and/or property | 4 |
| C4 No environmental impact | Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property | 0.1 |

**How we use assessment scores**
The number and severity of non-compliances recorded in a year will affect your annual subsistence fee the following year. A non-compliance factor is added to your site's Operator Performance Risk Appraisal (OPRA) score when we calculate your fee to reflect the additional resource we use to assess permit compliance.

**If your assessment result in Section 1 is suspended, what does this mean?**
In line with our guidance, we may suspend scores for up to six months to allow time for remedial action to be taken. Suspended scores will be re-instated if the action is not completed.
