4 DOCUMENTATION AND FEES14

1 Introduction

1.1.1 This Non-Technical Summary accompanies a bespoke permit variation application to continue to operate the site at Unit 103, Zone 1, Deeside Industrial Park, Flintshire, CH5 2LR under a Tier 3 Bespoke Environmental Permit (Ref: EPR/CB3593HF), with the following specific changes:

- a) To extend the site boundary to include land to the south and east of the existing permitted site.
- b) To add D9, D14 and D15 to the recovery/disposal codes listed in Table S1.1 of the permit (in-line with the codes listed in SR2008 No 3).
- c) To allow the site to accept, store and treat household, commercial and industrial wastes (i.e. all wastes listed in the standard rules permit SR2015 No 6).
- d) To ensure the description of the 19 12 12 waste code does not limit the site to acceptance of 'other wastes (including mixtures of materials) from mechanical treatment of wastes other than those mentioned in 19 12 11 (**consisting only of co-mingled recyclable wastes**)'.
- e) To ensure the description of the 20 03 01 waste code does not limit the site to acceptance of 'mixed municipal waste (**consisting only of co-mingled recyclable wastes**)'.

1.2 The site is located at Unit 103, Zone 1, Deeside Industrial Park, Flintshire, CH5 2LR. The site is bordering open land i.e. the Airfields and Bob Francis Crane Hire to the south; immediately north, east and west of the site is industrial/commercial/business units within the Deeside Industrial Estate. The site's nearest residential receptor is 610m away to the south of the site.

2 Application proposals

- 2.1 Parry & Evans Ltd hold and operate a Tier 3 Environmental Permit (EP) for a materials recycling facility, this is to be extended in scope to allow the site to operate a full household, commercial industrial waste transfer station (with treatment) in addition to the materials recycling activities.
- 2.2 The overall throughput of the site will remain as existing (i.e. <250,000 tonnes per annum), but broken down according to the following approximate categories:
- 150,000 tonnes: Municipal Waste
 - 50,000 tonnes: Household, Industrial and Commercial Waste
 - 50,000 tonnes: Inert and Excavation Waste
 - 0 tonnes: Hazardous Waste
- 2.3 The bespoke variation is required for the extension of the site boundary to allow for additional storage for non-waste, the additional storage (keeping) of waste prior to removal, and treatment (all types of handling/processing) of waste. Please refer to the Boundary Schematic (Drawing No. 1537-DEE-MAP-05) in Appendix I of this Non-Technical Summary for details of the extents of the existing permit boundary and the additional land to be included in the permit as part of this variation application.
- 2.4 Specified waste management operations currently permitted by Table S1.1 of the existing permit (as listed in Annex IIA and IIB of The Waste Framework Directive 2008/98/EC) are:

- R3: Recycling/reclamation of organic substances which are not used as solvents
- R4: Recycling/reclamation of metals and metal compounds
- R5: Recycling or reclamation of other inorganic materials.
- R13: Storage of waste pending any of the operations numbered R1 to R12 excluding temporary storage, pending collection, on the site where it is produced).

2.5 It is proposed to add the following disposal codes to the permit (as permitted in the SR2008 No3 permit):

- D9: Physico-chemical treatment not specified elsewhere in Annex IIA which results in final compounds or mixtures which are discarded by means of any of the operations numbered D1 to D8 and D10 to D12.
- D14: Repackaging prior to submission to any of the operations numbered D1 to 13
- D15: Storage pending any of the operations numbered D1 to D14 (excluding temporary storage, pending collection, on the site where it is produced).

2.6 The changes to the EWC code list to include the household, commercial and industrial wastes are discussed in detail in Section 3 below.

3 Proposed changes to EWC code list

3.1 Table 3.1 below is an extract from the current permit, namely Table S2.1 which lists all waste which are currently accepted at the site. The two waste codes highlighted in bold and underlined are discussed in Section 3.2.

- 3.2 It is proposed that the following waste codes (as highlighted in Table 3.1 above) be amended as shown below:
- a) “19 12 12 – Other wastes (including mixtures of materials) from mechanical treatment of wastes”
 - b) “20 03 01 – mixed municipal waste”
- 3.3 The reason for the inclusion of the extended description ‘consisting only of co-mingled recyclable wastes’ on the existing permit was to ensure that the wastes accepted under these codes were in-keeping with the ‘materials recycling facility’ for which the permit was originally issued. As the permit is now being varied to include the full list of household, commercial and industrial wastes as permitted by the Standard Rules Permit SR2008 No3, these codes should be amended to lose this additional description as it no longer applies and all non-hazardous mixed wastes which fall within these codes (subject to the exclusions as specified in Table S2.1) should be permitted for acceptance.
- 3.4 Table 3.2 below presents the full (consolidated) list of waste codes which are to be accepted at the site under this permit variation application.
