For the attention of Sian McGregor-Andrew

Dear Sian,

Please find attached the Q4 VOC's report as required by **Reference Permit EPR/BU7545IM**.

- Q4 Total Class A VOCs as individual VOCs and Total Class B VOCs as Carbon report for 1st October to 31st December 2019.

All the results for the emissions points sampled are within the permit limits.

If you have any questions regarding the information above, please me at candice.sankoomar@sherwin.com.

Yours sincerely

Candice Aliasgar-Sankoomar

* (There is a measurement uncertainty of +/- 25%)

- [1] The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, expressed in the same terms as the emission limit value. Where the emission limit value is expressed as a range, the result is given as the 'minimum - maximum' measured values.
- [2] Where an internationally recognised standard test method is used the reference number is given. Where another method that has been formally agreed with the Agency is used, then the appropriate identifier is given. In other cases the principal technique is stated, e.g. gas chromatography.
- [3] For non-continuous measurements the date and time of the sample that produced the result is given. For continuous measurements the percentage of the process operating time covered by the result is given.
- [4] The uncertainty associated with the quoted result at the 95% confidence interval, unless otherwise stated.
