### Introductory note

#### This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This variation adds a new waste code (15 02 02\*) to the permit. This will enable the site to store wastes under European Waste Code 15 02 02\*. This variation is required to complement the contingency work Public Health Wales are undertaking in relation to waste produced during the deep cleansing of people and properties in a non-healthcare setting where possible cases of COVID 19 have been present. Wastes from the deep cleansing of people and properties in a non-healthcare setting contaminated or potentially contaminated with COVID 19 that has not been stored for at least 72 hours, will be categorised under the European Waste Catalogue as 15 02 02\* (absorbents, filter materials (including oil filters not otherwise specified), wiping cloths, protective clothing contaminated by hazardous substances (infectious only)).

The variation allows the storage as per the 18 01 03\* code already on the existing permit.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
