5th February 2020

Dear Elizabeth,

Licence number: 18/54/01/0634
Site Details: Afon Iwrch Hydro Power Scheme

Further to your licence renewal reminder letter of 8th Jan this year, and our subsequent discussions, please find attached our application forms (WRA and WRD) for the renewal. Also included are:

- 1) HAF calculation sheet.
- 2) "Iwrch Abstraction Licence Renewal Additional Information Document, 3rd Feb 2020"
- 3) Drawing H2505 C02 Edition E, "Iwrch Weir Plan & Section" dated 3rd Feb 2020. This is the same As Built drawing that we understand you have had previously, but we have added extra notes and wing wall levels to this drawing as requested in your letter.
- 4) Drawing H2505-M025, Edition 0, dated 25th April 2007, showing compensation flow orifice plates.

We have arranged payment by BACS for the renewal fee of £1500 (based on the cost table you kindly provided, for a hydro power scheme of <100kW).

We hope the above drawings and information provide the additional information you asked for. Please contact us if you require anything further. Apologies if some of the formatting of forms WRA and WRD has gone awry, we have had trouble with these.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Nick Curtis', written in a cursive style.
