Subject: Package treatment Plant replacement

Mr Simms

Thank you for taking the time to speak to me this afternoon, due to the proximity of the discharge from the septic tank (which is being upgraded to a package treatment plant) to the River Wye SAC which includes the river Irfon you will need to apply for a bespoke permit to discharge to the stream rather than an exemption.

The application form can be found here <https://naturalresourceswales.gov.uk/permits-and-permissions/water-discharges-and-septic-tanks/discharges-to-surface-water-and-groundwater/apply-for-a-new-bespoke-permit/?lang=en> with a step by step guide on which parts are relevant. You may be required to mention the borehole within your application.

I have also added to this email a map showing the measurement from the septic tank to the receiving water course which is within 500m as described on the phone.

If you have any questions please do not hesitate to get in contact with me.

Kind regards
Jenny
