Section 1 – Compliance Assessment Summary

This is based on the requirements of the permit under the Environmental Permitting Regulations or the licence under the Water Resources Act 1991 as amended by the Water Act 2003. A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

Notified on the 20.06.20 of the event in which CSO located and bargoed colliery was discharging unpermitted effluent during a non storm event. Blockage caused a discharge to the environment.

No impact claim sent by DCWW

Under 16_02 guidance of 'no impact' I accept the claim given by DCWW as:

Evidence of 'no impact'

Photographs provided by DCWW show no discolouration, sediment materials entering and the absence of a visible plume in the watercourse

Quality of effluent described in no impact claim and photographed by DCWW suggests effluent diluted by rainfall with no materials present

However please note if unpermitted discharges continue to occur in this area. These may not qualify as no impact claim in the future, require DCWW to undertake investigatory and remedial measures and subject to enforcement action.
