Whitehead, Julian <Julian.Whitehead@cyfoethnaturiolcymr...> Sep 27 at 10:04 AM

To: Breian57@yahoo.com

Hello Breian,

I am sorry about the delay in getting back to you. I have just heard back from permitting and it seems that you can both apply as joint operators on one permit, as long as there is only one spreading area (see email below).

I hope this helps.

Many thanks.

Julian

Subject: RE: groundwater permit

Hi Julian,

We can issue permits for one person to spread at their farm whereby the dip is derived at different farms. If it was just one spreading area then it would just be one permit (one lot of £390 application fee) and both persons could be named as operators as long as their both completed a Part A and signed the declarations in Part F1.

Thanks,

Jenny

Hi Jenny,

Sorry about the delay. Thanks for the info.

I think that their idea was that they would both use one permit with one spreading area, in which case, I guess they would only need the one assessment.

Is that possible?

Thanks

Good Morning Julian,

Have both permits definitely lapsed? Pre-EPR GW permits used to have end dates on them but these should have been removed during the GWDD to EPR update back in 2011/2012.

If they have both lapsed and are no longer active permits then they will need to re-apply for a permit. Technically both operators can be named on a single permit and the permit could regulate both spreading activities. However, as we will still need to carryout separate
