### Section 1 – Compliance Assessment Summary

This is based on the requirements of the permit under the Environmental Permitting Regulations or the licence under the Water Resources Act 1991 as amended by the Water Act 2003. A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

**KEY:** See Section 5 for breach categories, suspended scores will be indicated as such.  
**A** = Assessed or assessed in part (no evidence of non-compliance), **X** = Action only,

### G1. Monitoring of emissions & environment

Thank you for sending the monitoring results received on the 3rd January 2017 in relation to Schedule 3, Table 3.1 of your permit. Reporting of emissions to air for CHP 1 and CHP2 for the period 07/09/2016 - 12/09/2017.

These results are complete.

Permit condition 3.1.2: The limits in Schedule 3 shall not be exceeded

**CHP1** seems to be over the limit value for Total Volatile Organic Compounds (VOCs) but within the limits when taking the measurement uncertainty (MU) associated with the results; the limit specified by the permit is **1000mg/m<sup>3</sup>** whereas the amount reported was **1172mg/m<sup>3</sup>**.

The MU for VOCs is +/- 40%; a result of 1172mg/m<sup>3</sup> is 'approaching the limit' specified in the permit.

**CHP2** seems to be over the limit value for Total Volatile Organic Compounds (VOCs) and for Oxides of Nitrogen but within the limits when taking the measurement uncertainty (MU) associated with the results; the limit specified by the permit for VOCs is **1000mg/m<sup>3</sup>** whereas the amount reported was **1295mg/m<sup>3</sup>**. The limit specified by the permit for Nitrogen is **500mg/m<sup>3</sup>** whereas the amount reported was **574mg/m<sup>3</sup>**.

The MU for VOCs is +/- 40%; a result of 1295mg/m<sup>3</sup> is 'approaching the limit' specified in the permit, the MU for Nitrogen is +/- 30%: a result of 574mg/m<sup>3</sup> is also 'approaching the limit' specified in the permit.

It is advised that CHP1 and CHP2 are assessed at the nearest opportunity to reduce the possibility of it breaching the above permit condition.

Thank you for the submission of the report.

Regards
