Section 1 – Compliance Assessment Summary

This is based on the requirements of the permit under the Environmental Permitting Regulations or the licence under the Water Resources Act 1991 as amended by the Water Act 2003. A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

As part of routine sampling it came to the attention of Natural Resources Wales (NRW) that Afonwen laundry had become non-compliant with a total suspended solids of 128 mg/l (limit 60 mg/l) and BOD reading of 84.7 mg/l (limit 40 mg/l).

In discussions with Afonwen Laundry it was stated that the treatment plant had been serviced a week before the non-compliance and was given a clean bill of health.

Please provide information from daily checks for a fortnight up to the date of the non-compliance and details of the daily check procedure for review by NRW.

NRW will provide past data in due course.
