2. What action is required?

No action required.

3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

Site visit pre-arranged with Mr Maull.

Site is operational but foul flows generated over the year have been reduced due to impact of covid on number of customers.

Green box in foreground of photo is the location for future caravan cassette emptying. This will be to a sealed cesspit. Installation will be at a later date depending on touring caravan site permissions. This tank will not be connected to the package treatment plant. Emptying of this cesspit must be carried out by a registered waste carrier and waste transfer notes retained for at least two years.

The package treatment plant (PTP) is pictured below, located next to the small green box. This plant had been recently serviced.

The small watercourse to the left of the PTP was clear of any sewage debris and sewage fungus along the route to the boundary with the main road. It is understood that during high rainfall events, the watercourse backs up.

Site to be revisited during a high usage period.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.
