The main features of the permit are as follows.

This is a Tier 3 bespoke permit for a for a household, commercial and industrial waste transfer station with treatment.

Treatment operations are limited to manual and/or mechanical sorting and separation, screening, cutting using hand held equipment only, compacting by use of loading shovel/360° excavator and baling, for the purpose of recovery/disposal.

Treatment activities must take place within a building.

Permitted waste types are waste electronic and electrical equipment and separate fraction metal wastes.

The maximum quantity of waste accepted and processed on site shall not exceed 24,999 tonnes per year.

This permit does not allow any point source emission into surface waters or groundwater except:

- clean, rainfall dependant drainage from areas of the site not used in connection with the storage and/or treatment of waste, and

Drainage from external areas of the site used in connection with the storage and treatment of wastes will be collected in a 30,000 litre sealed tank, which will be collected and removed off site for disposal.

There are to be no emissions to surface and/or groundwater from the buildings on site.

All emissions from the activity which are not controlled via actual emission limits, are controlled through the 'emission of substances not controlled by emission limits condition' and any relevant process requirements set out in Tables S1.1 and S1.2.

The burning of any wastes, either in the open, inside buildings or in any form of incinerator is not permitted.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.
