

Schedule 1 - Notification of abnormal emissions

This page outlines the information that the Operator must provide to satisfy conditions 5.1.1 and 5.1.2 of this Permit.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the PPC Regulations.

Part A

Permit Number	AP3433ES
Name of Operator	Kepak Group Ltd
Location of Installation	Merthyr Tydfil
Location of the emission	S1
Time and date of the emission	02/01/2020

Substance(s) emitted	Media	Best estimate of the quantity or the rate of emission	Time during which the emission took place
Oil & Grease (mg/L)	Effluent	324 mg/L	02/01/2020

Measures taken, or intended to be taken, to stop the emission	Emission detected after the date of emission.

Part B

Any more accurate information on the matters for notification under Part A.	The breach occurred in the week with low production as a result the ETP was not working at full capacity resulting in an unbalanced mix within the ETP and the subsequent discharge which resulted in the breach. Source of oil investigated – no leaks reported on site.
Measures taken, or intended to be taken, to prevent a recurrence of the incident	Visual checks to be carried out by the site services and engineering teams to ensure that all leaked oil has been contained before entering the site's effluent drainage system.
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment or harm which has been or may be caused by the emission
