

Schedule 1 - Notification of abnormal emissions

This page outlines the information that the Operator must provide to satisfy conditions 5.1.1 and 5.1.2 of this Permit.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the PPC Regulations.

Part A

Permit Number	AP3433ES
Name of Operator	Kepak Group Ltd
Location of Installation	Merthyr Tydfil
Location of the emission	W1
Time and date of the emission	02/04/20

Substance(s) emitted	Media	Best estimate of the quantity or the rate of emission-	Time during which the emission took place
Suspended Solids	Surface Water	116 (mg/l)	02/04/20

Measures taken, or intended to be taken, to stop the emission	This submission has been detected after the date of the emission

Part B

Any more accurate information on the matters for notification under Part A.	Investigation into root cause launched at site. No spills had occurred on the site in the week of 30 th March up to and including 2 nd April. The interceptors were serviced on 22 nd April and were found to be in good condition. /working order with no build-up of oil. W2 samples taken on the same day (2 nd April) were within the permit limits. Visual check on the stream when carrying out the sampling at W1 and weekly weir gate checks did not identify and pollution.
Measures taken, or intended to be taken, to prevent a recurrence of the incident	Introduction of site based lab
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment or harm which has been or may be caused by the emission	Introduction of site based lab to provide more accurate monitoring and improve early identification of any issue and improved response time.
