Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

We have varied the operator's permit to include two new waste codes: 16 10 02 (aqueous liquid wastes destined for off-site treatment other than those mentioned in 16 10 01), and 19 05 99 (wastes from aerobic treatment of solid wastes – wastes not otherwise specified). The operator will be allowed to accept effluents derived from the treatment of non-hazardous organic wastes, specifically from composting facilities.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
