Comments: The water target is based on total site water usage. For 2020 we lowered the target to 2.8m³/Tonne (set at 3m³/Tonne in 2019), in which we achieved this for 48 weeks of the year with an average of 2.42m³/Tonne. This target is based on achieving tonnage of 550T per production week (our baseline). We will continue to run various projects and review results through 2021. Our 2020 target is currently set at 2.7m³ based on expected tonnage for Q1. Potable water was slightly increased due to increased production.

Raw Meat Production has changed name to Fresh Meats, Cooked Meat to Fresh Food Cooked and Raw Value Added Meat to Fresh Food Raw. This is to match with a department name change and is a change in name only.
