

REPORTING OF ENERGY CONSUMPTION

Reporting Period (Year).....2020.....

Operator: **Dunbia (UK)**

Permit Number: **BU8002**

Location: **Crosshands**

FORM E1
2 JULY 2004
ENERGY
PAGE 1 OF 1

Energy Source	Annual Energy Consumption	
	Energy Used (MWh)	
Electricity	12996.6	
Natural Gas	7575.59	

Comments:

There was a slight increase in Electricity usage in comparison to last year due to the increase in production tonnage. The site target for Electricity usage was set at 340kWh per production tonne and the average of the year was 299kWh. The usual peaks and troughs were identified, as during the Summer months, electricity increases through the refrigeration and is lower during the Winter months. Alongside projects that have run throughout the year, the site has been working to reduce this usage. Projects such as LED lighting and line shut down audits.

The Gas usage has also increased since last year, mainly due to the increase in Cooked product being produced. The target set was set at 240kWh. These targets were continuously hit throughout the year and a new target will be set for 2021.
