Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

The variation is to change the monitoring of the carbon monoxide emissions from a ½ hourly average with a maximum of 100 mg/m³ to a 10-minute average with a maximum of 150 mg/m³. This monitoring frequency is in line with the industry emissions directive chapter IV and Annex VI part 3, paragraph 1.5.

The variation also includes a correction to an error in the previous permit version on table S2.2. The header of the table was changed from “Maximum quantity 200,00 tonnes per annum” to “Maximum quantity 200,000 tonnes per annum”

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
