

Good Afternoon,

I have finished my initial assessment of your application and require some additional information.

1. There are 3 areas of protected species (reptiles and amphibians). I have marked them with red dots on the attached map.

ACTION: Please amend application to protect these species and the associated habitat.

Please see the amended spreading plan. I have marked a 50m radius exclusion zone around the habitat areas marked on the map. The respective tonnage has been deducted from the application as a result of decreased spread area

Note: Area is in a phase 3 SPZ please ensure all buffer zones are respected.

The permit holder receives a full contractor pack and individual copies of spreading maps. The permit holder will be consulted prior to work commencement to discuss details of the spreading and ensure that the spreading operative is aware of the sensitivity of the water courses in this area. The contractor pack includes this document detailing the deployment pre-approval correspondence with NRW.

Your application will be paused until I receive a response. Please respond no later than 15/03/21.

Best regards

Ethan
