### Introductory note

**This introductory note does not form a part of the notice**

The following notice gives notice of the variation of an environmental permit.

This is a variation consisting of:

- a regulator led variation to add Table S1.1 activities back into the permit as it was deleted in error in variation EPR/CP3494FZ/V007; and
- an operator led variation to decrease the annual throughput to 4,999 tonnes per annum.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

**Status log of the permit**

### Schedule 3 – conditions to be added

The following conditions are added following a Natural Resources Wales initiated variation

**Table S1.1 activities**

Description of activities for waste operations	Limits of activities
<b>R13:</b> Storage of waste pending any of the operations numbered R1 to R12 (excluding temporary storage, pending collection, on the site where it is produced)	All storage and treatment of waste shall take place on impermeable surface with sealed drainage or hard standing unless otherwise stated.
<b>R4:</b> Recycling/reclamation of metals and metal compounds	All batteries shall be stored in containers with an impermeable, acid resistant base and a cover.  There shall be no treatment of batteries other than sorting and separation.  Treatment consisting of: <ul style="list-style-type: none"><li>- sorting</li><li>- bulking</li><li>- cutting</li><li>- shearing</li><li>- separation</li><li>- cable stripping</li></ul> into different components for recovery.  The maximum quantity of hazardous waste received and stored on site shall not exceed 10 tonnes per day.  Waste types as specified in Table 2.1
